Point of view

- ▶ Sentiment analysis mostly classifies *subjective* language as positive/negative.

Point of view

- ▶ Sentiment analysis mostly classifies *subjective* language as positive/negative.
- ▶ Objective statements could be positive or negative.

Point of view

- ▶ Sentiment analysis mostly classifies *subjective* language as positive/negative.
- ▶ Objective statements could be positive or negative.
 - ▶ Barack Obama was named the 2009 Nobel Peace Prize laureate. Positive

Point of view

- ▶ Sentiment analysis mostly classifies *subjective* language as positive/negative.
- ▶ Objective statements could be positive or negative.
 - ▶ Barack Obama was named the 2009 Nobel Peace Prize laureate. Positive
 - ▶ Edward Theodore confessed to killing two women. Negative

Point of view

- ▶ Sentiment analysis mostly classifies *subjective* language as positive/negative.
- ▶ Objective statements could be positive or negative.
 - ▶ Barack Obama was named the 2009 Nobel Peace Prize laureate. Positive
 - ▶ Edward Theodore confessed to killing two women. Negative
- ▶ Some *objective* articles give the reader a positive/negative impression about their subject matter.

Reasons for POV

- ▶ The main reason for different POVs in objective documents is that authors are influenced by their background.

Reasons for POV

- ▶ The main reason for different POVs in objective documents is that authors are influenced by their background.
- ▶ The background could impact the written document in two ways:

Reasons for POV

- ▶ The main reason for different POVs in objective documents is that authors are influenced by their background.
- ▶ The background could impact the written document in two ways:
 - ▶ there are always many different non-equivalent ways of conveying a given piece of information, some more positive, some more negative.

Reasons for POV

- ▶ The main reason for different POVs in objective documents is that authors are influenced by their background.
- ▶ The background could impact the written document in two ways:
 - ▶ there are always many different non-equivalent ways of conveying a given piece of information, some more positive, some more negative.
 - ▶ the selection of what information to present (positive vs negative).

Example for POV difference: Fritz Haber

Fritz Haber: Different objective descriptions of same fact

Fritz Haber: Different objective descriptions of same fact

- ▶ English Wikipedia: “has been described as the father of chemical warfare. “

Fritz Haber: Different objective descriptions of same fact

- ▶ English Wikipedia: “has been described as the **father of chemical warfare**. “
- ▶ French Wikipedia: “considered the **father of chemical arms**. “
- ▶ Spanish Wikipedia: “has been described as the **father of chemical warfare**. “
- ▶ German Wikipedia: “made him the **father of chemical arms**. “
- ▶ Russian Wikipedia: “Haber is called the **father of chemical arms**. “

Fritz Haber: Different objective descriptions of same fact

- ▶ English Wikipedia: “has been described as the **father of chemical warfare**. “
- ▶ French Wikipedia: “considered the **father of chemical arms**. “
- ▶ Spanish Wikipedia: “has been described as the **father of chemical warfare**. “

Motivation

- ▶ The automatic identification of POV differences is of high potential for content analysis in the social sciences.

Motivation

- ▶ The automatic identification of POV differences is of high potential for content analysis in the social sciences.
- ▶ Our work tries to answer empirically some social science research questions such as:
 - Are all relevant POVs equally represented?*
 - How favorably are the objects perceived?*
 - Do different groups of people view a certain object differently in a systematic fashion?*

- ▶ The sentences are labeled *manually* into one of the **POV** classes: positive, neutral, and negative.
- ▶ We use Amazon Mechanical Turk (AMT) to annotate the corpus.

Absolute POV corpus

The interface of AMT experiment

The Task

The Target: Ariel Sharon

The Paragraph

After retiring from the army, Sharon had joined the Likud party, and served in a number of ministerial posts in Likud-led governments in 1977-92 and 1996-99. He became the leader of the Likud in 2000, and served as Israel's Prime Minister from 2001 to 2006. In 1983 the commission established by the Israeli Government found that as Minister of Defense during the 1982 Lebanon War Sharon bore "personal responsibility" for the massacre by Lebanese militias of Palestinian civilians in the refugee camps of Sabra and Shatila, for his having disregarded the prospect of acts of bloodshed by the Phalangists against the population of the refugee camps, and not having prevented their entry. The Kahan Commission recommended Sharon's removal as Defense Minister, and Sharon did resign after his initial refusal to do so. In the 1970s, 1980s, and 1990s, Sharon championed construction of Israeli settlements in the West Bank and Gaza Strip.

Absolute POV corpus: Agreement

- ▶ We assign a sentence to the class chosen by at least two of the three annotators.

	Arabic	English
agreement – all workers	.30	.48
agreement – majority of workers	.90	.95
Fleiss' κ	.215	.419

POV Differences corpus

- ▶ We downloaded articles that are in the *people* category and present in both Arabic and English Wikipedias.

POV Differences corpus

- ▶ We downloaded articles that are in the *people* category and present in both Arabic and English Wikipedias.
- ▶ We selected 30 pairs of articles from 4 different categories.

POV Differences corpus

- ▶ We downloaded articles that are in the *people* category and present in both Arabic and English Wikipedias.
- ▶ We selected 30 pairs of articles from 4 different categories.
- ▶ Annotators were asked to compare each pair of articles based on the articles' POV toward its subject.

POV differences corpus

Annotation setup and example of a completed annotation for POV differences.

Target: Michael Faraday

Q1. The attitude of the English article toward the target compared to the Arabic article is:

1. Much more positive
2. More positive
3. Equal
4. More negative **X**
5. Much more negative

Q2. Briefly justify your answer to question 1.

Both articles have a very positive attitude towards Faraday but I sensed it more in the Arabic one. For example in the marriage section of the Arabic article compared with the English one, the attitude was much more positive and it mentioned that he was a loved, devoted, humble person which isn't mentioned in the English article. Also the controversy with Davy was only mentioned in the English article not the Arabic one. The Arabic article didn't mention anything negative towards Faraday.

POV differences corpus

- ▶ The intercoder agreement is $\alpha = .585$.

POV differences corpus

- ▶ The intercoder agreement is $\alpha = .585$.
- ▶ We map the five point rating scale to $[-2, -1, 0, 1, 2]$,

POV differences corpus

- ▶ The intercoder agreement is $\alpha = .585$.
- ▶ We map the five point rating scale to $[-2, -1, 0, 1, 2]$,
- ▶ The gold standard score Δ_{POV}^g for a pair of articles is the average of the three scores given by the annotators.

Adolf Hitler

From Wikipedia, the free encyclopedia

"Hitler" redirects here. For other uses, see *Hitler (disambiguation)*.

Adolf Hitler (German: [ˈadɔlf ˈhɪtlɐ] ⓘ[ⓘ]; 20 April 1889 – 30 April 1945) was an Austrian-born German politician and the leader of the **Nazi Party** (German: *Nationalsozialistische Deutsche Arbeiterpartei* (NSDAP); National Socialist German Workers Party). He was chancellor of Germany from 1933 to 1945 and dictator of Nazi Germany (as *Führer und Reichskanzler*) from 1934 to 1945. Hitler was at the centre of Nazi Germany, *World War II* in Europe, and the Holocaust.

Hitler was a decorated veteran of World War I. He joined the German Workers' Party (precursor of the NSDAP) in 1919, and became leader of the NSDAP in 1921. In 1923, he attempted a *coup in Munich* to seize power. The failed coup resulted in Hitler's imprisonment, during which time he wrote his memoir, *Mein Kampf* (*My Struggle*). After his release in 1924, Hitler gained popular support by attacking the *Treaty of Versailles* and promoting *Pan-Germanism*, *antisemitism*, and *anti-communism* with charismatic oratory and *Nazi propaganda*. Hitler frequently denounced international *capitalism* and *communism* as being part of a Jewish conspiracy.

Hitler's Nazi Party became the largest democratically elected party in the German *Reichstag*, leading to his appointment as chancellor in 1933. Following *fresh elections* won by his coalition, the Reichstag passed the *Enabling Act*, which began the process of transforming the *Weimar Republic* into the Third Reich, a *single-party* dictatorship based on the *totalitarian* and *autocratic* ideology of *National Socialism*. Hitler aimed to eliminate Jews from Germany and establish a *New Order* to counter what he saw as the injustice of the post-World War I international order dominated by Britain and France. His first six years in power resulted in rapid economic recovery from the *Great Depression*, the denunciation of restrictions imposed on Germany after World War I, and the annexation of territories that were home to millions of ethnic Germans, actions which gave him significant popular support.

Adolf Hitler

Adolf Hitler in 1937

Führer of Germany

Classification limitations

- ▶ Incorrect classification.

Classification limitations

- ▶ Incorrect classification.
 - ▶ S1: Hitler was an Austrian-[born]_{neutral} German [politician]_{neutral} and the leader of the [Nazi party]_{negative}.

Classification limitations

- ▶ Incorrect classification.
 - ▶ S1: Hitler was an Austrian-[born]_{neutral} German [politician]_{neutral} and the leader of the [Nazi party]_{negative}.
 - ▶ S2: Hitler was at the centre of [Nazi]_{negative} Germany, World War II in Europe, and the [Holocaust]_{negative}.

Classification limitations
